

# SSWP Hydropower, FERC Project No. 2426 Daily Field Summary

Date:	4/2/2018	Survey Team #:	4
Survey Team Members:	J. Seaman L. Butler		
Survey Location(s):	Pyramid Dam Area/Middle Piru Creek		

### Botanical Species Observed

Site was predominantly unvegetated, downstream of the dam with service roads and excavated rock. Vegetation communities occurred on the hillslopes and riparian habitat surrounding Piru Creek. Dominant vegetation communities consisted of California buckwheat, California Sage, yerba santa. Riparian was forested, covered by cottonwood + willows.

### Datasheets Completed (list datasheet names, use Additional Comments Section if more space is required)

California Native Species Field Survey Form	USFS TES Plant Element Occurrence Field Form	Non-Native Invasive Data Collection Form	USFS Invasive Species Infestation Record Field Form

USDA Forest Service TES Plant Survey Field Form or USDA Forest Service Survey Field Form (for NNIP) filled out for this location (list if relevant)?

### Incidental Wildlife Observations

Species	Observation Type (visual, track, audio, etc.)	Location/Notes
Gopher snake		
Turkey vulture		

### Additional Comments (access issues, iPad technical difficulties, etc.)

Much of the area was inaccessible due to difficult + steep terrain.
